Which of the following is true about the base plotting system?

Your Answer	Score	Explanation
Margins and spacings are adjusted automatically depending on the type of plot and the data		
Plots are created and annotated with separate functions	✓ 1.00	Functions like 'plot' or 'hist' typically create the plot on the graphics device and functions like 'lines', 'text', or 'points' will annotate or add data to the plot.
 The system is most useful for conditioning plots 		
Plots are typically created with a single function call		
Total	1.00 / 1.00	

Question 4

Which of the following is an example of a valid graphics device in R?

Your Answer		Score	Explanation
The keyboard			
A file folder			
A PNG file	~	1.00	
A socket connection			
Total		1.00 / 1.00	

Question 5

Which of the following is an example of a vector graphics device in R?

Your Answer		Score	Explanation
• SVG	~	1.00	
○ JPEG			
O PNG			
○ TIFF			
Total		1.00 / 1.00	

Question 6

Bitmapped file formats can be most useful for

Your Answer		Score	Explanation
Scatterplots with many many points	~	1.00	
Plots that may need to be resized			
Plots that are not scaled to a specific resolution			
Plots that require animation or interactivity			
Total		1.00 / 1.00	

Question 7

Which of the following functions is typically used to add elements to a plot in the base graphics system?

Your Answer	Score	Explanation
oboxplot()
